DETAILED ACTION

1. Applicants' preliminary amendment filed August 28, 2004 is acknowledged and has been entered. Claims 1-5, 9, 10, 23 and 25-27 have been amended. New claims 29-47 have been added. Claims 1-47 are now pending in the present application.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-5 and 29-35 drawn to a method for producing a protein and a protein expressed by this method.

Group II, claims 6-28 and 36-47, drawn to a hybrid protein.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature of Group II, the hybrid protein, is not special in view of the recombinant hybrid *Neisseria* protein disclosed in Goldstein et al 5547670, see

columns 2-7. The technical feature of Group II is not special in that it does not define a novel contribution over the prior art; as such there is not a special technical feature and therefore the Groups of inventions, I-II, lack a corresponding special technical feature.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I elect two SEQ ID NO from SEQ ID NO: 1-4326, see claims 1 and 2.

Group II elect two different Neisserial proteins, see claims 7, 8 and 17
 elect a specific protein, see claim 18
 elect a specific deletion, see claim 12
 elect a specific truncation, see claim 14
 elect a specific domain deletion, see claim 16

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form

or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: SEE ABOVE.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The technical feature of Group II, the hybrid wherein a deletion is made is not special in view of the disclosure of Goldstein et al 5547670, see column 4. The technical feature of Group II is not special in that it does not define a novel contribution over the prior art; as such there is not a special technical feature and therefore the Groups of inventions, I-II, lack a corresponding special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
